

TYLER HOWLE

07359325668 | t.howle06@outlook.com | thowle06.gitlab.io | www.linkedin.com/in/t-howle06

EDUCATION

2024-Present **University of Nottingham**
BSc (Hons) Computer Science

Modules included:

- Assembly Language Programming (83%), Computer Architecture (83%), Developing Maintainable Software (81%)
- Programming & Algorithms (77%), Databases & Interfaces (75%)

Current Modules: Software Specification, C++ Programming, Advanced Functional Programming, Algorithms & Data Structures

2022-2024 **Doncaster UTC**
Diploma in IT (D*D*), Computer Science (A*), Mathematics (B),
AS Further Mathematics (C)

EXPERIENCE

2025 **Bright Network IEUK 2025**
Technology & Engineering Intern

- Analysed large-scale server logs to detect bot traffic and system issues
- Proposed improvements to system functionality and performance using Docker and load balancing concepts
- Delivered technical report outlining findings and recommended updates

2023 **Brighter Futures LPT @ Doncaster UTC**
IT Support Technician Work Experience Placement

- Diagnosed and resolved hardware/software issues across school systems
- Upgraded and configured ~30 iMac devices
- Assisted with network, authentication, and printing issues

PROJECTS

Event Management System (Group Project)

Python (FastAPI) • React • PostgreSQL • Supabase • Docker • CI/CD

- Backend Developer and Git Lead in a team of 8 building a full-stack platform
- Implemented RESTful API endpoints for authentication and event management
- Integrated PostgreSQL and Supabase for data and authentication
- Defined Git workflows, conducted code reviews, and contributed to system design
- Built CI/CD pipeline and Docker Compose setup for development and testing

Todo List API

Node.js (Express.js) • REST API • Authentication • PostgreSQL

- Developed a secure REST API with token-based authentication and authorisation controls
- Implemented CRUD operations with validation, error handling, and user-level access control

- Designed relational schema and documented endpoints using Swagger/OpenAPI

Weather API

Node.js (Express.js) • Redis • External APIs

- Built backend API with async requests, Redis caching, and rate limiting
- Implemented logging and error handling to improve reliability and performance

Task Tracker CLI

C# • .NET • Linux • JSON

- Built CLI tool with structured command handling and file-based persistence

Personal Portfolio Website

HTML • CSS • JavaScript • GitLab Pages

- Developed responsive web portfolio showcasing projects

ACHIEVEMENTS & LEADERSHIP

- Post-16 Head Boy – led student initiatives and represented the school externally
- Raised £200+ through organising a charity fundraising event
- Awarded ‘Significant Contribution to Post-16 2024’ and two ‘Post-16 Achievement Awards’.

SKILLS

- **Languages:** Python, C#, Java, JavaScript, C, Haskell, Rust, C++.
- **Web Development:** Backend-end (FastAPI, Express.js, ASP.NET Core) and front-end (React, HTML, CSS)
- **Databases & Caching:** PostgreSQL, Supabase, Redis
- **DevOps & Tools:** Docker, Docker Compose, Git, GitLab CI/CD, GitHub, Linux
- **Software Practices:** Version control, code review, testing, Agile workflows, design standards
- **System Design:** REST APIs, application architecture, data flow
